

Camouflage Systems

Camouflage Face Paint (CFP)

Combined Camouflage Face Paint (CCFP)

Ghillie Suit Accessory Kit (GSAK)

Mission

Provide a variety of individual camouflage solutions for the Soldier in the visible and near-infrared regions of the electromagnetic spectrum; protection against thermal imagers, which operate in the mid- and far-infrared regions of the spectrum; and protection against insects.

Description and Specifications

Camouflage Face Paint (CFP) is used on all exposed skin to provide passive camouflage protection in the visible and near-infrared regions of the electromagnetic spectrum but does not provide protection against thermal imagers, which operate in the mid- and far-infrared regions of the spectrum. The current camouflage compact is a cosmetic-like container with an acrylic mirror and compartments containing four colors.

The **Ghillie Suit Accessory Kit (GSAK)** provides surveillance units and snipers with various camouflage materials to construct, repair, and modify Ghillie Suits to meet unique mission and climatic requirements. The lightweight kit consists of 17 items. GSAK contains four colors of jute burlap strips, duck cloth, nylon cord, sewing needles, thread, foam padding, tie straps, face paint, over-white trousers, over-white mittens, over-white parka, netting, camouflage covers, trouser suspenders, and several other accessory items that complement natural colors, patterns, shadows, and textures to fabricate and maintain one Ghillie Suit.
